

SIGMAT COVID-19 STATEMENT

In light of the recent UK Government announcement, COVID-19 pandemic is impacting every part of our lives as we know it. In light of this, Sigmat Ltd will continue to develop our swift approach to the virus and keep all of our stakeholders updated as necessary.

The health, safety and wellbeing of all those who work with and for us, as well as the general public, is always our top priority. As always we remain vigilant and continue to actively promote preventative measures to minimise the risk of infection.

We support the UK Government's position to allow the construction industry to continue operating where it can do safely.

Our Manufacturing Facility and sites remain operational where we are able to appropriately implement safe site operating procedures. Our COVID-19 Risk Assessments are fully aligned to latest UK Government guidelines to ensure the continued health, safety and wellbeing of all involved.

We want to reassure you that Sigmat Ltd have acted quickly and responsibly in line with all Government guidelines by setting up remote working where practicable. Where it is not feasible to work from home, our staff within offices, sites and our Manufacturing Facility are abiding by social distancing rules at all times with rotas and 'bubbles' in place to meet these Guidelines.

Our focus is the safe continuity of our business during this period and we will continue to review our solutions as the situation evolves.
